

ABOUT ME

Asifiwe Kasereka Jérémie is my name. I am a young entrepreneur, currently working at Fallax Vision as a Projects Manager and a software developer, and looking for new opportunities. I officially started my professional career in May 2018 and haven't stopped challenging myself since.

I believe in a redefined Neutral Web. I get great fulfillment in solving large complex problem with technology, and I am passionate about Software Development and Graphics Design. I have endlessly built my skills to separate what people think they want from what they deserve to have.

WORK EXPERIENCE

Software Developer

2022 – to date

Fallax Vision

I help manage projects, clients, and day-to-day activities; I also keep an eye on future development projections and pivoting orchestration.

Projects Manager

2018 – to date

The BeniTalk

Help with tech stuff: website, graphics designer, content production, digital marketing campaigns, etc.

Co-fondateur & CEO

2019 – 2022

Fleed Tech Limited

Being a co-founder of this company allowed me to acquire managerial skills. After a year of work, I was promoted to the position of Managing Director, a position I currently occupy.
